**One-Vault | GitHub:** [Code repository](#) | **Deployed Link:** [Live page](#)

A MERN stack application allows users to store their usernames and passwords of any websites and in one place.

**Languages and tools:** CSS3, HTML5, React, MongoDB, Mongoose, JWT, Bcrypt, Bootstrap.

**Weather-Dashboard | GitHub:** [Code repository](#) | **Deployed Link:** [Live page](#)

The app allows users to view current and future weather conditions, temperature, humidity, wind speed, and the UV index for cities.

**Languages and tools:** JavaScript, JQuery, Ajax, CSS3, HTML5, and OpenWeather API

## EXPERIENCE

**Web Developer at Wat Prachum Raingsey Association** (Volunteer) May 2021 - Present, Yelm WA

Design and develop a website for the association. Provide an effective way to pass on information about the association to the general public.

**Interior Designer at JPC Architect**

May 2018 - Aug 2020, Bellevue WA

Recognized by principal architects for talent in graphic design and created graphic templates for tech companies such as Samsung and Oculus. The bold design templates allowed branding and signage teams to communicate their ideas more clearly.

**Intern Interior Designer at Lair Design**

Jun-Dec 2016, Seattle, WA

Managed and designed staging projects and coordinated with multiple vendors, resulting in on-time delivery, correct installation, and meeting the provided budget.

## EDUCATION

**University of Washington** Full Stack Web Development Certificate

Sep 2020 - Mar 2021

**Washington State University**, Bachelor of Arts in Interior Design

Aug 2014 - May 2017

**New England of Technology** Associate of Science in Architectural Technology

Jan 2010 - Dec 2011
